

Hardwood-Laminate-Vinyl

Transitions

In some cases, the manufacturers of hardwood, laminate & vinyl tile do not make their own transitions that match your new flooring. For the manufactures that do make their own transitions, those transitions are not made in the same factory.

The manufactures and Floor Solutions can not be responsible for the shade or color of the transitions that are supplied for your new flooring. Be advised that the transitions will be coordinating rather than a matching. This is a standard flooring industry policy in regards to all transitions.

Wall Tile

Certain collections of tile have a coordinating wall only tile to work with the floor tile in that collection. These tiles are not made in the same factory.

The manufactures and Floor Solutions can not be responsible for the shade, color or texture of the tile that is supplied. Be advised that the transitions will be coordinating rather than a matching. This is a standard flooring industry policy in regards to all floor/wall combination collections.

Bullnose Tile

Certain collections of tile have a coordinating bullnose tile to be used as a finishing trim. The bullnose tile is not made in the same factory as the floor or wall tile.

The manufactures and Floor Solutions can not be responsible for the shade, color or texture of the bullnose tile that is supplied. Be advised that the transitions will be coordinating rather than a matching. This is a standard flooring industry policy in regards to all bullnose tile.
